

# How to Measure

## HOW TO MATCH YOUR FAVORITE FIT

- The measurements on the size chart are based on garments laying flat, unstretched.
- Chest and Waist measurements are measured by circumference.
- For accurate sizing, we suggest you measure a similar garment that you already own, using it as a point of reference.
- We recommend you measure a garment that fits you well.
- Lay garment flat on a table when measuring.

## HOW TO GET YOUR MEASUREMENTS

- **Sleeve:** With garment laying flat and unstretched, use measuring tape to carefully measure your sleeve from where the top of your shoulder would be, extending tape down to end of sleeve hem. When measuring for hoodie, measure to bottom of cuff.
- **Chest:** With garment laying flat and unstretched, take a measuring tape and carefully measure where your chest would be, which is about 1" under your arm. Once you have that measurement double it for circumference.
- **Waist:** With garment laying flat and unstretched, take a measuring tape and carefully measure where your waist would be, which is between the bottom of your rib cage (typically where your body bends side to side) and the top of your hips. Once you have that measurement double it for circumference.
- **Inseam:** With garment laying flat and unstretched, take a measuring tape and carefully measure your inseam, which starts from the top of your inner leg and extends to the bottom of where your ankle would be. For best results follow the inner seam all the way down to the bottom hem.

ECO TEE	XS	S	M	L	XL	XXL	3XL	4XL
Chest	32"	36"	40"	44"	48"	52"	56"	60"

\*Please Note: Eco Tee is intended to be a slimmer fit. We suggest sizing up for a more relaxed look.
